

# Challenger Machine

## OSCILLATING ACTION

**Multi-Functional Orbital Machine: Carpet Cleaning, Hard Floor Cleaning, Wax Floor Stripping, and Floor Polishing for USA, Europe and Asian Markets.**

The Challenger Pad System is a revolutionary new carpet cleaning system that is making news from the front page in Longview, Texas, to Boston Magazine, which rates it as "Best in Boston". Customers who are use to hot water extraction (HWE) methods of carpet cleaning have found dramatic improvements they call unbelievable. In tests at Dalton's Carpet Mill it ranked first in cleaning "trashed out" carpet when compared to other low moisture cleaning systems. Yet in Boston's most discriminating homes it is preferred because of its "all natural odorless, water conserving methods that dry in minutes.

**Carpet Troubles: Odor, Matted Pile, Pet Problems, Spot Removal, Traffic Lanes, Stain Removal and Wicking.**

**What Is The Challenger OP Machine?**

The Challenger oscillating pad machine features two movements, first a random orbit is created, allowing the pad to clean all sides of the carpet fibers while also utilizing a freewheeling revolution, similar to an orbital car polisher.

**Carpet Types:** (Wool, Polyester, Polypropylene, Nylon), Berber, Carpet Types (Smooth, Twist, Shag, Texture, Loop, Olefin, Synthetic, Upholstery, Acrylic).

## TESTIMONIALS

Dominic from New Jersey says: "Wow!!! You guys have an awesome product in the Challenger and this hard core HWE'er (after 30 years experience) is totally impressed! I initially thought it (the Challenger) may be just a step above using a rotary, bonnet cleaning, but I now know OP cleaning is light years ahead!!! Thanks again for a great product.

Linda from Wright Patterson Air Force Base Bowling Alley says: "The Challenger System is the first carpet cleaning machine we have used which has no bleeding back of the stains we are trying to get rid of in our center. The Orbit-Kleen cleaner, used by the Challenger smells good and works exceptionally well. I am a small person and the Challenger is really comfortable - even for me - to use on the carpets."

Becky at Two Harbors Restaurant in California says: "We cruised around with our equipment (the Challenger Machine) and cleaned three houses. Everyone was AMAZED. The company (Two Harbors Resort) will not be putting new carpet in each rental every time someone moves out anymore."

Neil from Australia says: "I have had my Challenger for a few weeks now. It is the first one in Australia. The Challenger is great for all my residential and small commercial work. It is much easier to get up the stairs than the HWE and easy to get in and out of the van. It does a fantastic job."

Derek from New York says: "I am glad I decided to buy the tile brush attachment with my Challenger. I did a test area in a men's room of an office we clean five nights a week. I threw the brush attachment on and went to town. Took about eight minutes (including dwell time) and the tile looked as good as when I have had subcontractors use their TM and Turbo type tile and grout cleaning tool. I tell you, every time I use the Challenger I am thrilled with the results. What a machine! Thanks, Lee Watson.

Keith Jones at Highland Pines Nursing home in Texas says: "We have been using the Challenger Pad System and Orbit Kleen cleaner for four years and have found it superior to all other carpet cleaning systems we have tried."

## FAQ's

### How does this method compare to the deep cleaning action of a steam cleaning machine?

The Challenger has proven its superiority over steam cleaning machines by saving carpets that other cleaners have given up on. When moisture is extracted with a steam cleaner, stains and soil are often retained in the base of the carpet. It gives a clean appearance initially, but the dirt wicks back to the surface as the carpet dries. The oscillating and rotating motions of the Challenger's moistened terry cloth pad does not allow the dirt and stains to hide. The Challenger thoroughly cleans the carpet. The carpet dries in one hour and stays clean longer.

### What is the cost of cleaning carpets after you have purchased the Challenger Pad System?

One gallon of Orbit Kleen, properly diluted, will clean (8) typical two bedroom apartments. One gallon of Orbit Natural, properly diluted, will clean 9600 Sq Ft coverage per gallon at a cost of \$.53 cents per gallon.

### Do you need to do time consuming stain treatments before cleaning?

Our customers have found that both the Orbit Kleen Chemical and Orbit Natural will get most stains out of the carpet without any other treatments. You spray a 40 sq ft area, clean with the machine and you're done. Red stains "may" come out with any of several different methods, bleached spots will remain, and pet stains that have burned the carpet will leave a yellow stain behind. These few exceptions aside, our system and our chemical will satisfy your most finicky customers.

### Is the Challenger machine profitable and durable?

One professional carpet cleaner said that his machine paid for itself in the first week! A maintenance man reduced carpet cleaning time by 66%! We have designed the Challenger machine to give many years of worry free service. Its all steel welded frame construction is built to last for decades.
